**November 1-3, 2019:** MVQ National Teacher Event

## SUMMER QUILTS: WHAT TYPE OF FABRIC TO USE?

### Natural vs Synthetic

Linen and cotton wick moisture and breathe freely; perspiration won't cling to you and air will circulate over your skin, helping you stay dry and dreaming. Synthetic fibers -- polyesters -- trap air and moisture; you'll feel like you're sleeping in a plastic bag on a hot night.

Linen's Weave: Spring for natural, but pay attention to the weave. Linen is a loose weave that softens with wear. It's durable as stone but it wrinkles like crazy -- a restless sleeper could create a less-than-smooth sleep surface, and, with linen, you have to love the rumpled look or love ironing.

Cotton's Thread Count: Cotton is the all-around winner, but watch the thread count. The higher the thread count, the denser the weave and the less breathable the fabric. About a 300 or 400 thread count is all you need for warm weather. But also remember short life on low thread count too

Summer temperatures vary and nights are cooler at higher elevations or when weather systems roll through. You'll want some extra coverage on hand and, with the right layers, you can vary bedding to ensure perfect comfort.

## Officers Needed for MVQ Guild Sept 2019

We need volunteers to take on a number of position as officer with the quilt guild in September of 2019,. The positions open are:
